

Environmental Policy Statement

Established in 1988, the Rabbit Group is a family firm that is committed to generating green electricity from suitable construction, demolition, commercial and industrial waste. Rabbit Waste Management Ltd is the parent company of the Group and has various subsidiaries including Enviropower Ltd, which operates an Energy Recovery Facility. The Energy Recovery Facility is certified to the ISO 14001: 2015 Standard.

The Rabbit Group is committed to undertaking its activities whilst minimising its environmental impact and at all times operating within the letter, and the spirit, of governing legislation.

Specifically, the Rabbit Group commits to:

- Protect the environment, and prevent pollution of land, air and water.
- Embed circular economy principles, seeking to keep resources in the value chain for as long as possible, and minimising waste through source reduction, reuse and recycling, and recovery of energy where possible.
- Handle and dispose of wastes through safe, environmentally responsible methods.
- Ensure wastes are collected in a manner which does not cause nuisance or allow waste to escape, using vehicle routing software to minimise emissions.
- Conserve energy by improving efficiency of its use in our operations and make efforts to reduce the company's carbon footprint in the face of a climate emergency.
- Train and encourage our employees to conduct their activities in an environmentally responsible manner.
- Identify and engage in dialogue with interested parties as necessary, including neighbours, regulators, contractors and customers.
- Take a life-cycle perspective when considering our environmental aspects and impacts, including the ultimate fate of processed waste which is sent to 3rd parties.
- Define environmental objectives and targets to deliver the identified improvement in performance, and continually improve our environmental performance.
- Continually improve and develop our Environmental Management System to enhance environmental performance; and maintain certification to the ISO 14001:2015 Standard for the Energy Recovery Facility.
- Comply with the requirements of BS EN 14181 and maintain a management system for monitoring emissions to air in relation to the power plant.
- In addition to complying with relevant legislation, ensure that all compliance obligations are fulfilled, such as planning conditions and environmental permits.

Responsibility for ensuring the policy is fully implemented lies with the CEO.
